SAVE THE WORLD!

WE TAKE RESPONSIBILITY SERIOUSLY

Our commitment to the future requires us to pursue innovative paths to establish sustainability not just as a concept, but as a reality. The challenges we face are undoubtedly immense, yet they have also inspired us to seek and implement sustainable solutions.

THERE ARE SOLUTIONS!

We see ourselves as part of a growing global movement that is collectively searching for effective strategies to address the challenges of climate change. We take our responsibility for the future seriously and rely on innovative approaches that not only reduce costs, but also promote sustainability.

**We think about growth in a unique way:
not just in terms of getting bigger,
but also in terms of getting better.**

The vision of a future guides us, where sustainability reports are created not out of obligation, but from conviction. We firmly believe that with perseverance and innovation, a sustainable future is possible – a future in which we live in harmony with nature.

Elisabeth Goerner und Wilhelm Siller-Goerner

Packaging without plastic!

Lived circular economy

Folding boxes and molded fiber parts? More than just packaging! Made from sustainably sourced, renewable, and fully recyclable materials, they boast an impressive recycling rate of 100% at the end of their lifecycle.

A real power play in nature's cycle! In the world of circular economy, renewable resources are the stars. They provide the energy, protect our natural ecosystems, and draw a clear line against waste and harmful impacts.

AND GOERNER?

We are the champions of the bio-cycle! Our products are designed not just to disappear at the end of their journey but to return to the biological cycle. Our value chain is purely European, with a clear commitment to the SDGs of the United Nations. We make no compromises in choosing our partners and suppliers.

We forge alliances with partners from industry and commerce to strengthen trust in the Goerner Group and its know-how, enhance our market position, and provide our customers with significant added value. Choosing Goerner means selecting not just a product but a vision that unites competitiveness and sustainability.

Clean business practices

Clean environment

Our visions and goals align with the United Nations' global framework for sustainability.

Through genuine commitment and market-appropriate innovations, we make a significant contribution towards achieving tangible positive changes in the spirit of the **EUROPEAN GREEN DEAL**.

GOAL 3 + 4

We support charitable projects for a life worth living and assist school classes in the development of sustainable projects.

GOAL 13

We save up to 100 tons of CO₂ annually and offset unavoidable emissions with climate protection projects.

GOAL 9

We invest annually up to 10% of the Group's revenue in R&D to develop sustainable processes and products.
